AI LEGAL HELPER · EGYPT

Ma‘at

Justice, explained.

Upload an Egyptian law, contract or court ruling. Ask in Arabic or English. Get a clear answer from your own document.

01 · THE PROBLEM

Legal documents are hard to read, and help is expensive.

Dense legal Arabic

Laws, contracts and rulings are long, formal and full of jargon.

Lawyers cost money

Most students and citizens can't pay a lawyer to explain every page.

Chatbots guess

General AI chatbots don't read your document, so they can be confidently wrong about it.

WHO IT'S FOR

The people who need the law most.

Law students

Read real laws and rulings, and check their understanding article by article.

Egyptian citizens

Understand a rental or work contract before signing it.

Researchers

Find the passages that answer a question in a long document.

Small legal practices

Get a fast first reading of a case file without a large team.

OUR SOLUTION

Ask your own document.

1

Upload

A law, a contract or a court ruling, as a PDF.

2

Ask

In Arabic or English, or tap a suggested question.

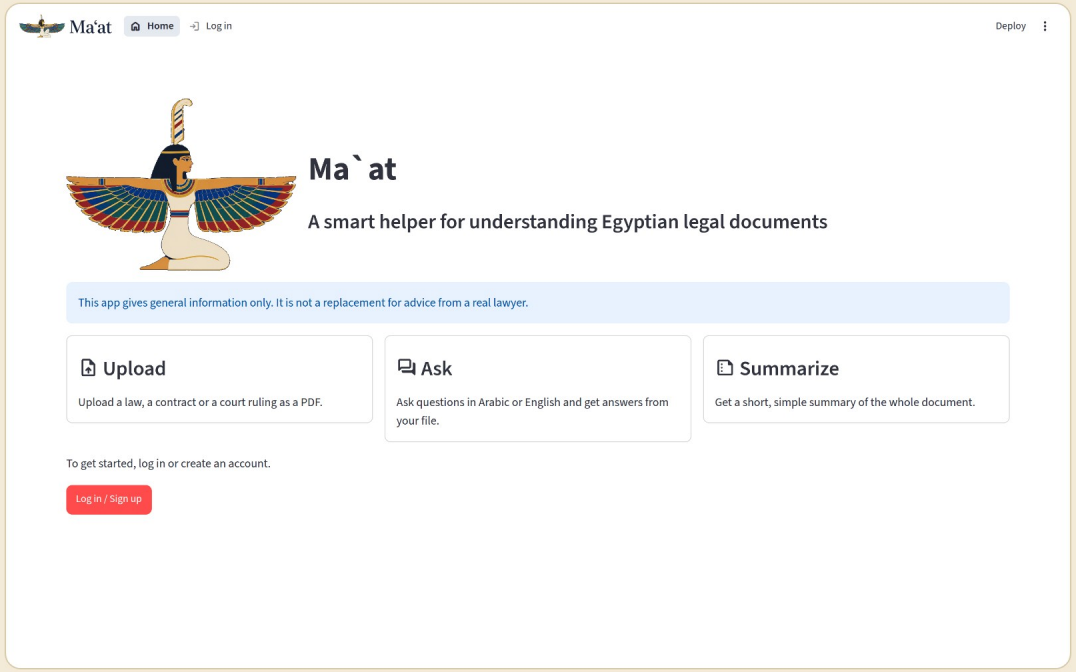

3

Understand

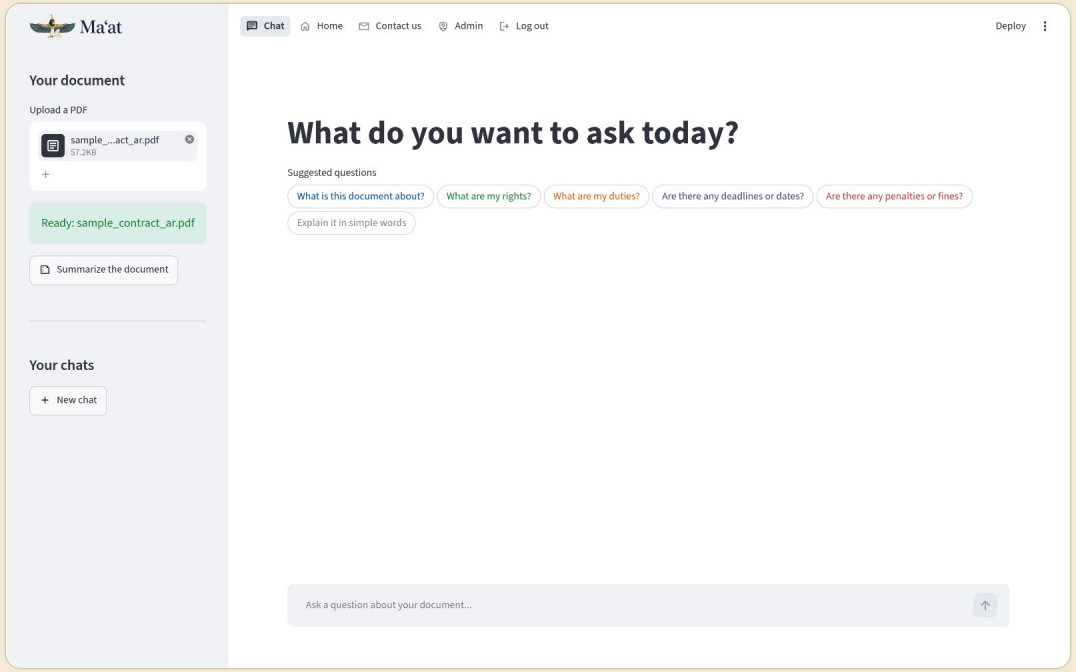

A clear answer that cites the articles, or a one-click summary.

02 · DEMO

Start with your own PDF.

Home: what Ma'at does, in three steps.

Upload in the sidebar: the PDF is read and indexed in seconds.

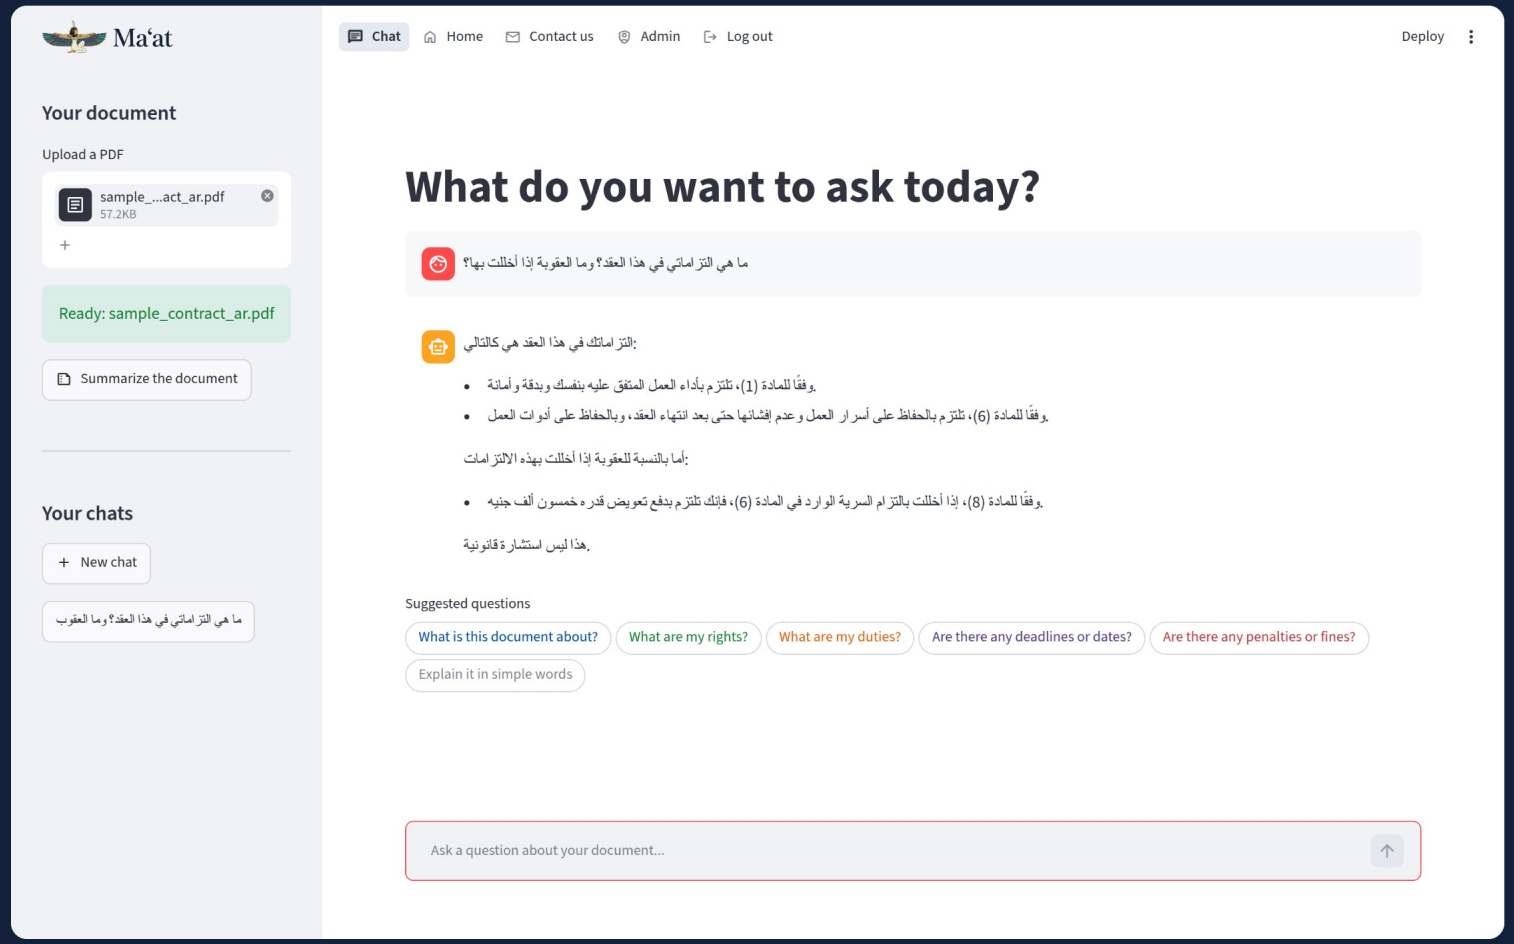

02 · DEMO

Ask in Arabic.

ما هي التزاماتي في هذا العقد؟ وما العقوبة إذا أخللت بها؟

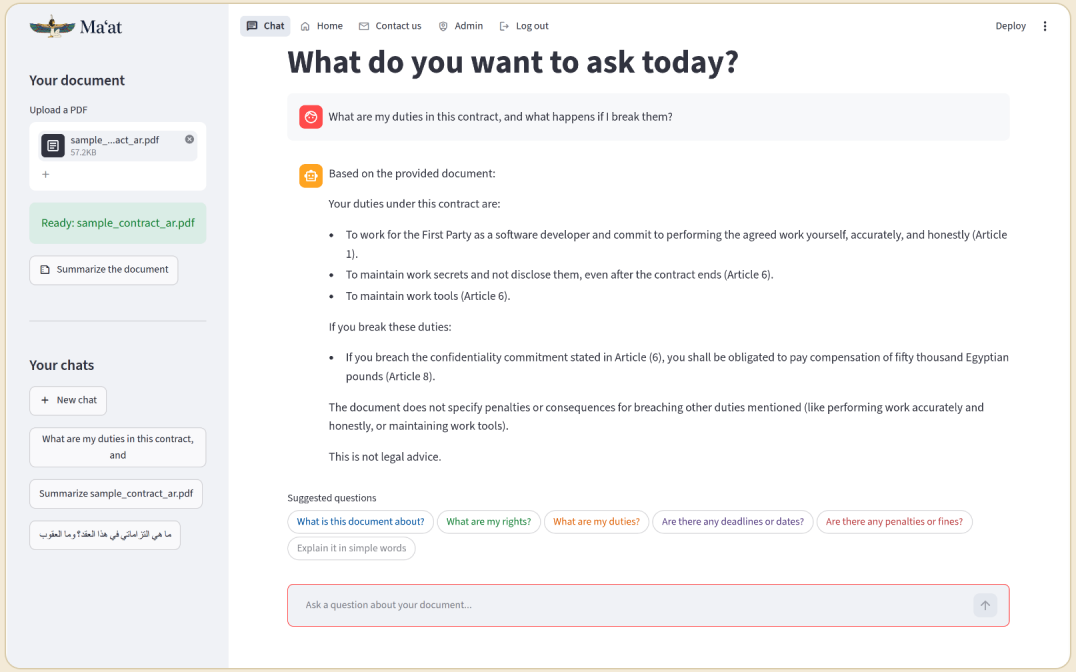

“What are my duties in this contract, and what is the penalty if I break them?”

The answer comes back **in Arabic** and cites the articles: (1), (6) and (8).

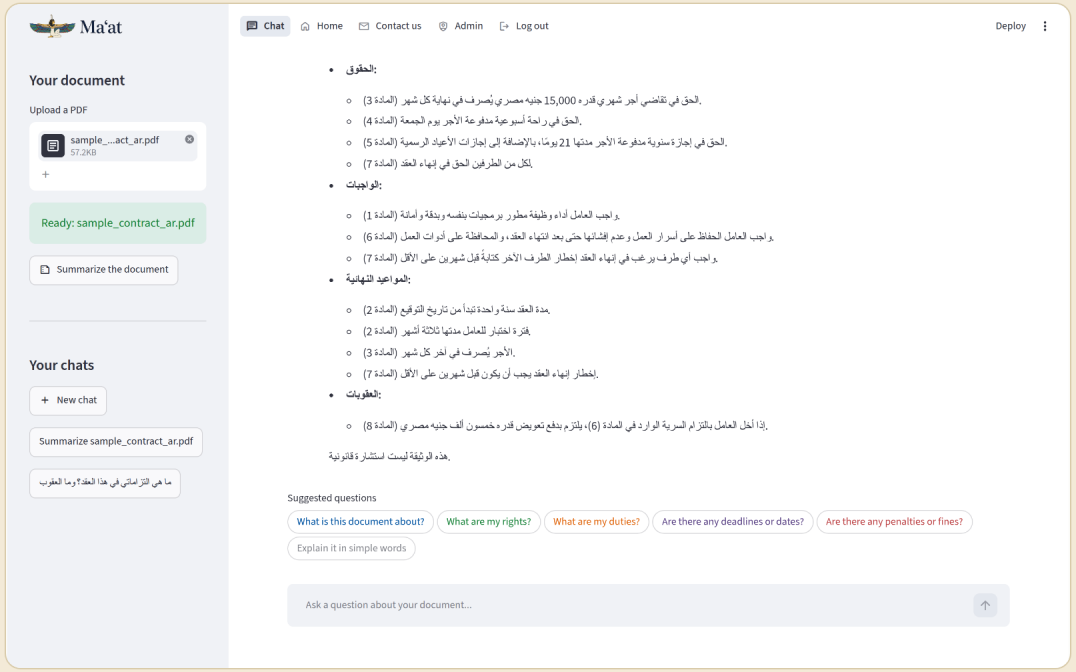

02 · DEMO

Ask in English, or get a summary.

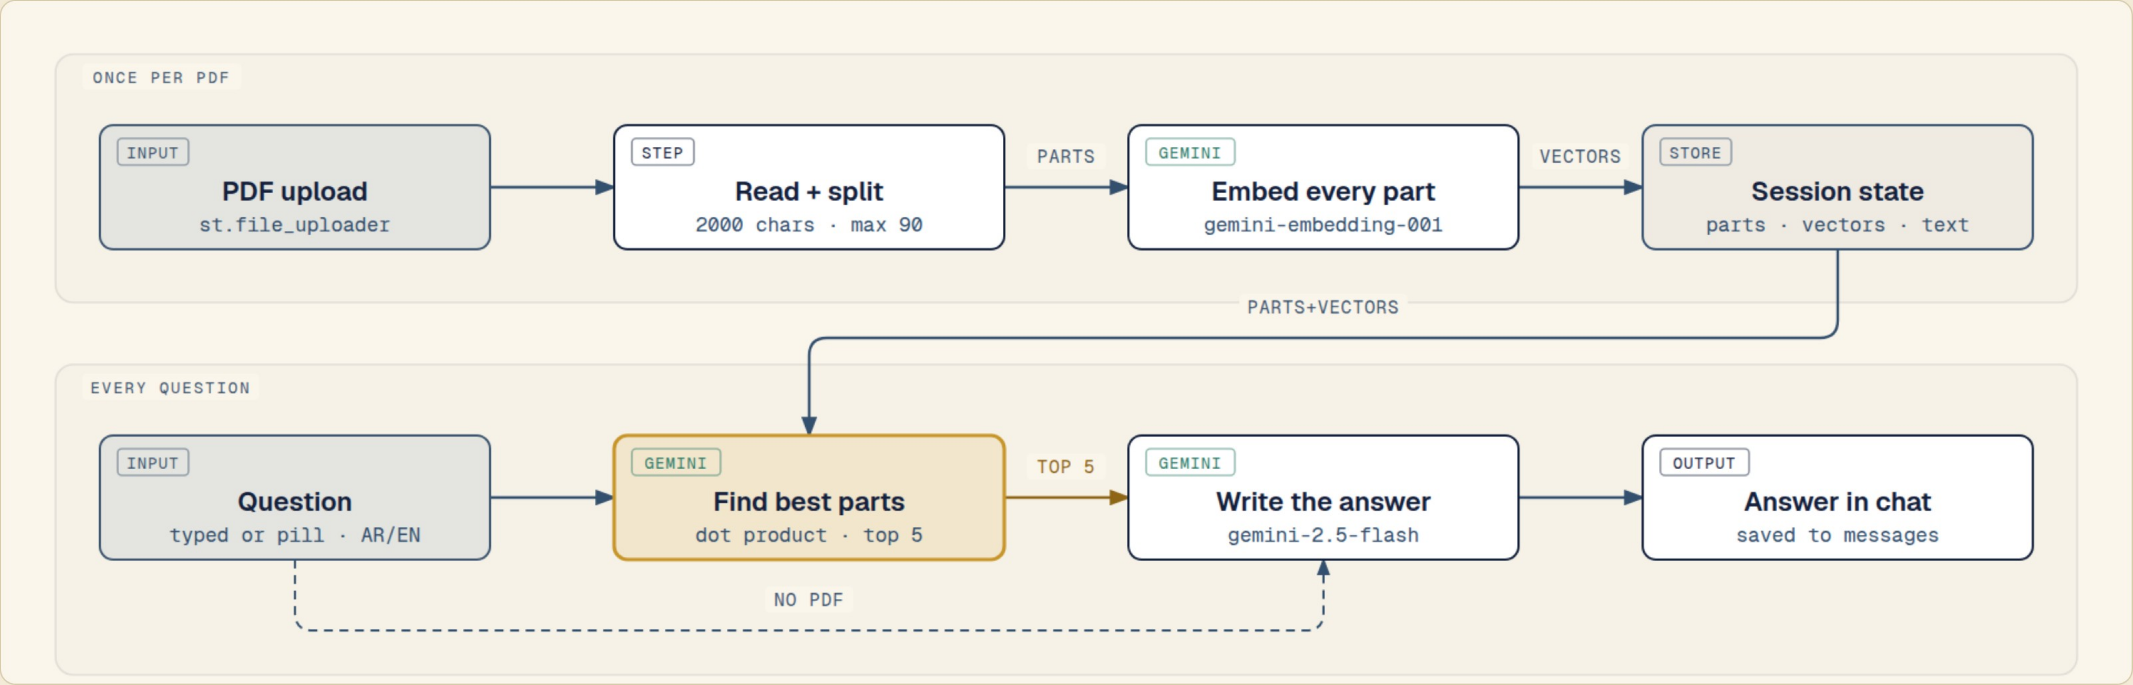

Same Arabic contract, English question: the answer is in English.

One click: rights, duties, deadlines and penalties, with articles.

03 · HOW IT WORKS

Find the right parts, then answer.

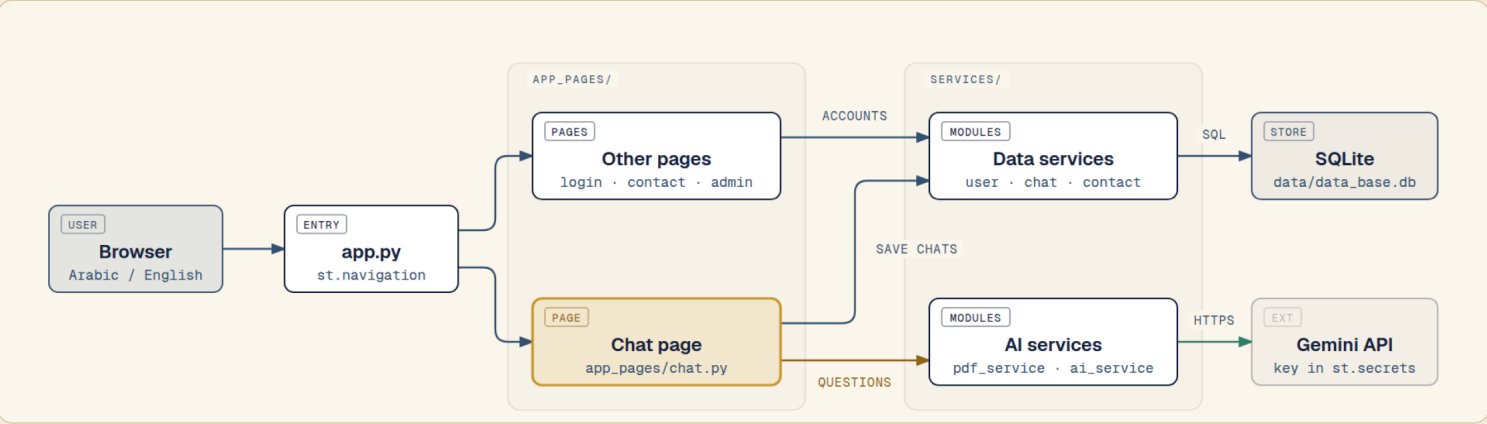

Parts of 2,000 characters

Top 5 parts by dot product

Answer in the question's language

03 · HOW IT'S BUILT

Built so a beginner can read every line.

3 libraries: Streamlit, pypdf, google-genai

0 classes: plain variables and functions

13 Python files, one topic each

Python + Streamlit for the website · SQLite for users and saved chats · Gemini for embeddings and answers.

WHY THE NAME

Ma‘at: truth, justice and balance.

Ma‘at was the ancient Egyptian goddess of truth and justice. She wears an ostrich feather on her head.

In the judgement of the dead, a person's heart was weighed on the scales against her feather.

Our app helps people weigh what a document really says.

Thank you.

Ma'at explains; it does not replace a lawyer. Not legal advice.
